### 4. FIRST AID MEASURES

<b>Inhalation</b>	IF INHALED: Immediately remove person to fresh air. Immediately call a poison control center or doctor for treatment advice.
<b>Skin contact</b>	Immediately take off all contaminated clothing. Rinse skin with water / shower. Call a physician or poison control center immediately. Chemical burns must be treated by a physician.
<b>Eye contact</b>	Immediately flush eyes for at least 15 minutes. Remove contact lenses if present and easy to do. Continue rinsing. Call a physician or poison control center immediately.
<b>Ingestion</b>	Call a physician or poison control center immediately. Rinse mouth. DO not induce vomiting. If vomiting occurs, keep head low so that stomach content doesn't get into lungs.
<b>Most important symptoms / effects, acute and delayed</b>	Burning pain and severe corrosive skin damage. May cause severe irritation or burns to the eyes, skin, gastrointestinal tract, and respiratory system. Causes serious eye damage. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result.
<b>Indication of immediate medical attention and special treatment needed</b>	Provide general supportive measures and treat symptomatically. Chemical burns: flush with water immediately. While flushing, remove clothes which do not adhere to affected areas. Call an ambulance. Continue flushing during transport to hospital. Keep victim under observation. Symptoms may be delayed.
<b>General information</b>	Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.
<b>Self-protection of the first aider</b>	If artificial respiration is required, use a pocket mask equipped with a one-way valve or other proper respiratory medical device.

### 5. FIRE FIGHTING MEASURES

<b>Suitable extinguishing media</b>	CO <sub>2</sub> ; foam; dry chemical. Trained fire-fighters may use water spray under certain conditions.
<b>Unsuitable extinguishing media</b>	Do not use water jet as an extinguisher as this will spread the fire.
<b>Specific hazards arising from the chemical</b>	During fire, gases hazardous to health may be formed.
<b>Special protective equipment and precautions for firefighters</b>	Sulfuric acid will not burn, but is capable of igniting finely divided combustible materials on contact. Use dry chemical agents to smother combustible materials. Avoid breathing mists and vapors. Use full protective equipment (acid-resistant bunker gear) and self-contained breathing apparatus.
<b>Unusual fire and explosion hazards</b>	Battery fluid can evolve flammable hydrogen gas when exposed to metals (such as during charging of lead acid batteries) and may increase the fire risk near sparks, excessive heat or open flames. See Section 10 for list of fire by-products.
<b>Specific hazards in case of fire</b>	Battery Electrolyte (Sulfuric Acid) is corrosive.
<b>Additional information</b>	Reacts violently with metals, nitrates, chlorates, carbides and other organic materials. Reacts with most metals to yield explosive flammable hydrogen gas.

## 6. ACCIDENTAL RELEASE MEASURES

<b>Personal precautions, protective equipment, and emergency preparedness</b>	Keep unnecessary personnel away. Keep people away from and upwind of spill / leak. Keep out of low areas. Wear appropriate protective equipment and clothing during clean-up. Do not breathe mist or vapor. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ensure adequate ventilation. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS. If toxic vapors are produced at unknown concentrations, wear a NIOSH-approved respirator or SCBA.
<b>Methods and materials for containment and cleaning up</b>	<p><u>Large spills:</u> Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Cover with plastic sheet to prevent spreading. Absorb in vermiculite, dry sand, or earth and place in containers. Prevent entry into waterways, sewer, basements or confined areas.</p> <p><u>Small spills:</u> Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination. Use clay, sand, or diatomaceous earth.</p> <p>Never return spills to original containers for re-use. For waste disposal, see section 13 of the SDS.</p>
<b>Environmental precautions</b>	Avoid discharge into drains, water courses, or onto the ground.

## 7. HANDLING AND STORAGE

<b>Handling</b>	Do not breathe vapor. Do not get in eyes, on skin, or on clothing. Avoid prolonged exposure. Provide adequate ventilation. Wear appropriate personal protective equipment. Observe good industrial practices.
<b>Storage</b>	Store locked up. Store in original tightly closed container. Store away from incompatible materials. Keep away from heat, sparks, and open flame. (See section 10 of the SDS)

## Safety Data Sheet (SDS)

<b>Engineering Controls (Ventilation)</b>	Good ventilation required (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewashes station.
<b>Personal protective equipment (Pictograms)</b>	
<b>Respiratory Protection</b>	<b>NONE REQUIRED UNDER NORMAL HANDLING CONDITIONS</b> When workers are facing concentrations above the exposure limit they must use appropriate certified respirators. Use a positive-pressure air-supplied respirator if there is any potential for an uncontrolled release, exposure levels are not known, or any other circumstances where air-purifying respirators may not provide adequate protection.
<b>Skin Protection</b>	Wear appropriate chemical resistant gloves and clothing.
<b>Eye Protection</b>	Wear safety glasses with side shields (or goggles). Face shield is recommended.
<b>General Hygiene Considerations</b>	Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and / or smoking. Routinely wash work clothing and protective equipment to remove contaminants.
